BSI & Optel: Your Trusted Partners For End-To-End ESG Compliance And Reporting

BSI, in collaboration with its technology partner Optchain™—a solution developed by OPTEL—offers a comprehensive solution designed to help organizations gain full visibility and control over complex supply chains. Underpinned through globally recognized standards, our end-to-end solutions empower you to proactively manage risk, ensure regulatory compliance, and drive continuous improvement.

With the EU Deforestation Regulation (EUDR), businesses must demonstrate that products linked to commodities like cattle, cocoa, coffee, soy, palm oil, rubber, and timber are:

| **Deforestation-free** | **Legally produced in the country of origin** | **Covered by a due diligence statement** |

Optchain™
BY OPTEL

BSI and Optchain™ help you meet these requirements confidently and turn compliance into a competitive advantage.

Our Collective Capabilities

Risk Management ✓
Expert led advisory services that identify and mitigate supply chain risks before they impact your business.

Regulatory Compliance ✓
Partnering with experts to navigate the ever evolving world of regulations, with professional guidance and practical tools, including the award winning Optchain traceability reporting platform.

Independent Verification ✓
Leverage third-party verification to build trust and credibility with yourreporting requirements.

Continuous Improvement ✓
Leveraging this end-to-end solution to drive progress with traceability, reporting, and alignment to industry best practices.

Our Value Proposition

Enhances brand reputation through trust and transparency.

Supports compliance with globally recognized standards.

Building trust and resilience across your supply chain.

"
Let's explore how BSI and Optchain™ can help you lead the way in sustainable, deforestation-free supply chains."

BSI supply chain traceability and transparency solution

Scope & Design
Ensure EUDR compliance and regulatory readiness through supply chain assessments, sustainable procurement strategies, due diligence, and supplier risk segmentation.

Supply Chain Mapping
Real-time, end-to-end supply chain monitoring with multi-tier mapping, lifecycle assessments, automated digitization satellite tracking, and continuous database management.

Assess & Manage
End-to-end program management with supplier self-assessment, desktop reviews and automated supplier engagement for streamlined efficient compliance processes.

Verification
Thorough supplier audits, identify root causes, implement corrective actions, and ensure CAPA closure for quality assurance.

Report
Standard and custom reports for all disclosures, providing clear insights and comprehensive reporting on your program results.

Engagement & Improvement
Gain actionable insights with metric analysis, supplier training, improvement programs, and aggregated data for complete traceability and enhanced performance.
